

26<sup>th</sup> January 2022

## Substances of Very High Concern in BICP-Aniline.

BICP-Aniline can contain 1-methyl-2-pyrrolidone, also known as NMP (CAS# 872-50-4, EC 212-828-1, date of inclusion 20/06/2011, decision number ED/31/2011). NMP can be present at a concentration above 0.1 % w/w but below 0.2 % w/w (and below the 0.3 % w/w limit as required by Commission Regulation (EU) 2018/588).

With the exception of NMP, I am pleased to confirm that none of the other 223 Substances of Very High Concern (SVHC's) included in the list of candidates for authorisation published by the European Chemicals Agency (updated 17<sup>th</sup> January 2022) are used in the manufacture of BICP-Aniline as supplied by AGC Chemicals Europe, Ltd.

Yours sincerely,

Dr Martyn Shenton  
Product and Process Steward  
AGC Chemicals Europe, Ltd.

Information contained in this publication (and otherwise supplied to users) is based on our general experience and is given in good faith, but we are unable to accept responsibility in respect of factors that are outside our knowledge or control. All conditions, warranties and liabilities of any kind relating to such information, expressed or implied, whether arising under statute, tort or otherwise are excluded to the fullest extent permissible in law.
