

ASAHIKLIN AE3000ATE

Asahiklin AE3000ATE, a mixture of Trans-1,2-Dichloroethylene, 1,1,2,2-tetrafluoroethyl-2,2,2-trifluoroethyl ether, ethanol, is a non-flammable, non-ozone depleting solvent.

Applications

- Defluxing of printed wiring assemblies
- Precision cleaning of plastics, substrates, electrical components, metals, and particle removal
- Drying agent after cleaning with hydrocarbons or alcohols
- Drying agent after aqueous cleaning
- Replacement for HCFC, perchloroethylene, trichloroethylene, Dupont™ Vertrel®, & 3M™ Novec™ solvents

Benefits

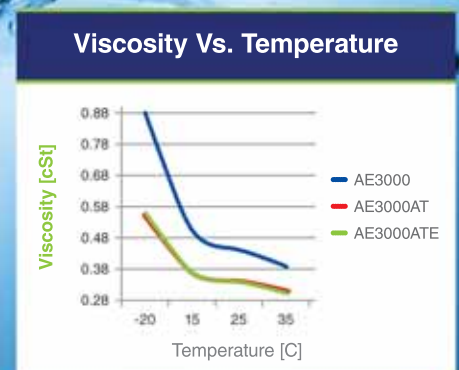

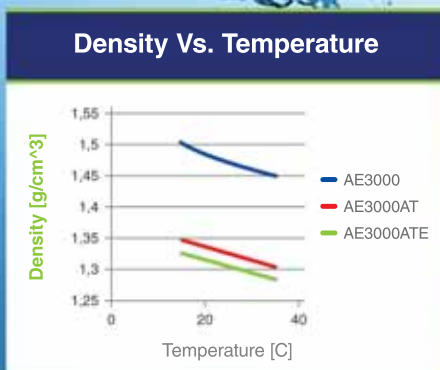

- Non-flammable
- Non-corrosive
- Superior drying property
- Excellent permeability
- Recyclable
- Low global warming potential (GWP)
- Zero ozone depletion potential (ODP)
- No surfactants necessary
- Recoverable by simple distillation
- Can be used with ultrasonics
- Material compatibility with a wide variety of metals, plastics, and elastomers
- Excellent thermal, chemical, and hydrolytic stability
- Low surface tension, low viscosity, high liquid density

Material Composition	
Components	Asahiklin AE3000ATE
Trans-1,2-dichloroethylene	46-55 %
1,1,2,2-tetrafluoroethyl-2,2,2-trifluoroethyl ether	43-52%
Ethanol	1-3%

Physical Properties	
Table 1 Physical Properties of Asahiklin AE3000ATE	
Boiling Point	42C (107.6F)
Melting Point	-50C
Density (g/cm ³ , 25C)	1.35
Viscosity (cSt, 25C)	0.34
Specific Heat (kJ/kg K, 25C)	1.40
Surface Tension (dyne/cm/ 25C)	18
Latent Heat of Vaporization (KJ/kg, 39C)	200
Relative Evaporation Rate (Ether=100)	92
Flash Point (Open/Closed cup)	none
KB Value	38

Cleaning Procedures

It is recommended that Asahiklin AE3000ATE be used in a vapor degreaser to optimize cleaning efficiency, economy, and emission control. Cleaning procedures for Asahiklin AE3000ATE are quite similar to those of AK225 products. The procedures consist of immersing a workload into the boiling solvent, rinsing or spraying with cool solvent and drying in solvent vapor.

Material Compatibility

Asahiklin AE3000ATE has a broad range of compatibilities.

Table 3 Effect of Asahiklin AE3000ATE on Unstressed Plastics at the Boiling Point.

Note: negative numbers denote shrinkage

	At boiling for 5min			At boiling for 3 days		
	Weight change (%)	Linear Swell (%)	Extractables (%)	Weight change (%)	Linear Swell (%)	Extractables (%)

Environmental Health and Safety

Please read the current product Material Safety Data Sheet (available through your AGCCA technical service representative) and the precautionary statement on the product package prior to use. Follow all applicable precautions and directions.

ASAHIKLIN AE3000ATE is nonflammable. The solvent acts as an azeotrope and is resistant to thermal breakdown and hydrolysis during storage and use. Recommended handling procedures are provided in the Material Safety Data Sheet, which is available from your AGCCA representative upon request.
